4. FIRST AID MEASURES

For advice, contact Poisons Information Centre or a doctor.

(For each route of exposure provide indication of medical attention and special treatment needed including description of most important symptoms, acute and delayed)

**Inhalation:**
Remove patient to fresh air  Keep warm and at rest, in a half upright position. Loosen clothing  Seek medical attention if ill effects occur

**Skin Contact:**
Remove contaminated clothing immediately and drench affected skin with plenty of water. Then wash with soap and water  Seek medical attention if irritation persists

**Eye Contact:**
If substance has got into eyes, immediately wash out with water for at least 15 minutes . Contact physician

**Ingestion:**
If swallowed accidentally, do not induce vomiting and seek medical advice.

**Note to Physician:**
5. FIRE FIGHTING MEASURES

Hazards from combustion products: Aerosols may explode if heated above 50°C Forms hazardous decomposition products CO, CO2

Precautions for firefighters and special protective equipment: Keep container(s) exposed to fire cool, by spraying with water In case of fire, do not breathe fumes

Suitable extinguishing material: foam, carbon dioxide or dry agent

6. ACCIDENTAL RELEASE MEASURES

Emergency procedures: Shut off all ignition sources
Ensure adequate ventilation
Wear suitable protective clothing and gloves.

Methods and materials for containment and clean up: Absorb spillage in suitable inert material
Place in appropriate container

7. HANDLING AND STORAGE

Precautions for safe handling: Keep away from heat and sources of ignition
Take precautionary measures against static discharges
Equipment should be earthed
Use explosion-proof electrical/ventilating/lighting/.../equipment.
Use only non-sparking tools.
Do not breathe aerosols or vapours.
Ensure adequate ventilation
Avoid contact with skin and eyes.
Wash thoroughly after use
Wear protective gloves/protective clothing/eye protection/face protection.

Conditions for safe storage: Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Keep out of reach of children

MSDS Material Safety Data Sheet
Short Term Exposure Limit - A 15 minute TWA exposure which should not be exceeded at any time during a working day even if the eight-hour TWA average is within the TWA exposure standard. Exposures at the STEL should not be longer than 15 minutes and should not be repeated more than four times per day. There should be at least 60 minutes between successive exposures at the STEL.
STEL
TGA Therapeutic Goods Administration
Threshold Limit Value - TLV is a proprietary name registered by the American Conference of Governmental Industrial Hygienists (ACGIH) and refers to airborne concentrations of substances or levels of physical agents to which it is believed that nearly all workers may be repeatedly exposed day after day without adverse effect.
TLV
TWA Time Weighted Average - The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day working week.
UN Number UN numbers are four-digit numbers that identify hazardous substances, and articles (such as explosives, flammable liquids, toxic substances, etc.) in the framework of international transport.
